

GENESIS

Superior design complemented
in resin technology

All the components for the
resin pool structure are
molded by an injection
process that enables us to
reinforce all the components.

Precision-adjusted components

Synflex resin bottom rails
come with exterior shields,
giving them strength.

Swim
Above
Ground
com

Your above ground pool has been designed to provide you with years of safe, family fun. This entails that water safety must always be taken into account. When used incorrectly, your above ground swimming pool can be dangerous; above ground pools are shallow, and this makes diving and jumping unsafe. To ensure your above ground pool is used safely, you must observe the safety precautions that are provided to you when you purchase an above ground pool and conform to all local regulations. © Copyright 2014

-enjoy your pool without losing your yard

Curved resin top ledges offer a perfect look and an outstanding rigidity. Beautiful metallic highlights accent the ledge cover and uprights.

VISION wall pattern beautifully coordinates with the Champagne color palette.

When it is hot outside, nothing beats wading in the cool waters of your above ground pool. The **Resin Series** brings you innovative technology and incredible endurance that will win your heart as the ideal fusion of high technology and impeccable style. Resin injection molding is a revolutionary process that eliminates corrosion risks and guarantees long-term dependability. Transform your backyard into an everyday vacation.

The special arching design notches make for a delightful play of light and shadows on the uprights.
